

Bow Use & Care

Important Information About Your Bow!

Tighten your bow to the proper amount. The stick should still bend in slightly.

Try to avoid touching the hair. The oils on your hands are not good for the hair!

Right now, you likely only need to rosin your bow about once a week. Apply rosin evenly to the bow (skip the first and last half inch). Do not scrape or scratch your rosin!

Always use a proper bow hold - think about all the details you've learned, and where each finger goes!

LOOSEN YOUR BOW BEFORE YOU PUT IT AWAY!

Treat your bow with care! It is not a toy, a light saber, or a sword.
